

Each block requires 6 white and 12 print/colored 2-1/2" x 4-1/2" pieces of fabric.

- 1 pair of color/print sewn together on the long side.
- 2 pairs of white sewn together on the short side
- 2 pairs of color/print sewn together on the short side
- 2 sets of 3 color/print sewn together on the short side

Let's construct!

- Start with the color print pair sewn on the long side
- Add 1 white across the top and 1 white across the bottom
- Add the white pair on either side
- Add color/print pair on top and bottom
- Last add a triple color/print set on each side

**YOUR BLOCK IS DONE!**

POTATO CHIP is a great name for this block because I bet you can't make just one!

Use whatever scraps you have in whatever color/print just keep the blocks consistent by using a white or white on white as described above.

This block can also be made with the colors reversed – whites in the middle and on the outside, colors in the middle
